"The Nature of the Firm" (1937), is an article by Ronald Coase.It offered an economic explanation of why individuals choose to form partnerships, companies and other business entities rather than trading bilaterally through contracts on a market. The author was awarded the Nobel Memorial Prize in Economic Sciences in 1991 in part due to this paper.

The Nature of Statistical Learning Theory | SpringerLink

The natural logarithm can be defined in several equivalent ways. The natural logarithm of a positive, real number a may be defined as the area under the graph of the hyperbola with equation $y = 1/x$ between $x = 1$ and $x = a$.This is the integral $\int_1^a \frac{1}{x} dx = \ln a$. If a is less than 1, this area is considered to be negative.. This function is a logarithm because it satisfies the fundamental property of a ...
