Beginner's Guide to Drupal - DreamHost

The Drupal form API gives a module a way

Download Ebook Drupal Beginners Guide

to define a form via a structured array, render it into HTML, handle validation and submission, and expose the form for other modules to alter. There are three basic steps needed to make this happen: Choose a unique identifier (letters, numbers, and underscores, typically starting with the module prefix) for your form; for example, "my_module_my_form"
