An example of using complex numbers (though it's Sargent and Hansen who use mathematical tools very frequently!) So things like analyzing impulse response in frequency domain, which is used in electrical engineering but definitely also relevant in economics. $\$ \endgroup \$$ - Joan Robinson Nov 26 '14 at 21:38

The Use of Math in Economic Analysis | Small Business ...

Mainstream economists are especially critical of Austrians for their lack of desire to incorporate mathematics in general, and multivariable calculus in particular, into their economic analysis. The criticism goes something like this: It does not matter whether or not mathematics is the most appropriate tool to describe economic human action. What matters is that most economists do use math ...
